

REMARKS

This Amendment is submitted supplementary to the previous Amendment and in connection with the personal conference with the Examiner.

The Examiner's highly beneficial cooperation during the personal conference has been gratefully acknowledged.

It has been determined that the present applicant contains an allowable subject matter when compared with the prior art applied against the claims.

At the same time it was also determined that additional clarification of the claims was needed to clearly define in the claims the objects of the present invention, namely a foam head for a propellant container, and a combination of the foam head with the propellant container, respectively.

In connection with this the original claims have been cancelled and a new set of claims have been submitted including claim 7, the broadest claim defining a foam head for a propellant container, and claim 8, the broadest claim defining a combination of the foam head with the propellant container, with claims 9 and 10 depending on claim 8.

Reconsideration and allowance of the present application is most respectfully requested.

The application in its amended state is believed to be in condition for allowance. Action to this end is courteously solicited. Should the Examiner have any further comments or suggestions, the undersigned would very much welcome a telephone call in order to discuss appropriate claim language that will place the application into condition for allowance.

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'Michael J. Striker', is written over the printed name.

Michael J. Striker
